Associate Director, Decision Support Group (now, Decision Sciences Group) Associate Director, Decision Support Group (now, Decision Sciences Group), AbbVie Inc., North Chicago, Illinois. Provide advanced analytical support for teams, portfolio & Long Range Plan (LRP) planning processes. Facilitate & lead project teams on single-asset decision or other strategic analysis projects. Apply methods of decision analysis & other analytic best practices to structure the decision problem, analyze data, & develop results & insights. Facilitate/manage decision team meetings to effectively convey & obtain information necessary for successful completion of analyses. Facilitate & contribute to development & execution of processes, timelines, tools & templates for Plan Portfolio / LRP data collection, as well as other decision & strategic analyses. Construct strategic models/dashboards to accurately reflect technical & commercial attributes of a project / asset for Plan Portfolio & LRP. Utilize knowledge of Decision Analysis & Operations Research literature & attend & contribute to conferences & symposia on DA & Portfolio Analysis. Discuss insights obtained with senior members of Decision Support Group & decision team. Manage complex portfolio analysis & prioritization tools and databases such as LRP data files and databases, lead portfolio & LRP data aggregation. Provide advanced analytical support for DSG-led team & management meetings (prepare meeting materials, record information gathered at meetings, & write-up minutes/action items); archive assessments, rationale, assumptions & other pertinent information. Utilize latest tools & techniques in decision analysis / portfolio analysis. Responsible for successful completion of modeling, analytical & facilitation assignments in timely manner. Accountable for quality, flexibility, & user-friendliness of complex models, & for quality of portfolio database & tools. Design complex decision analysis models to reflect technical & commercial interactions of project / asset utilizing decision analysis techniques such as Monte Carlo & Decision Tree analyses, sensitivity analysis, waterfall, & tornado charts. Responsible for large-scale data analysis involving integration of next generation sequencing data & health or pharmacological databases. Responsible for developing & executing custom computational analysis plans leveraging novel algorithms & relevant databases. Responsible for successful completion of modeling, analytical & facilitation assignments utilizing modeling & database software such as PowerPoint, Excel, Enrich, Tree Plan, ThinkCell & Crystal Ball. Must possess a Master's or foreign academic equivalent in Biological Sciences, Decision Sciences, Computational Biology, Bioinformatics, Biostatistics, or a closely related field with at least 2 years of related progressive experience in: (i) managing complex portfolio analysis & prioritization tools & databases such as LRP data files & databases, lead portfolio & LRP data aggregation; (ii) designing complex decision analysis models to reflect technical & commercial interactions of a project / asset utilizing decision analysis techniques such as Monte Carlo & Decision Tree analyses, sensitivity analysis, waterfall, & tornado charts; & (iii) completion of modeling, analytical & facilitation assignments utilizing modeling & database software such as PowerPoint, Excel, Enrich, Tree Plan, ThinkCell & Crystal Ball. Apply online at https://careers.abbvie.com/en & reference REF22832Y

Senior Engineer, Technology II Senior Engineer, Technology II, North Chicago, IL. Resp. for engineering solutions to support key business initiatives, across functional disciplines & tech solutions that solve significant integration or business problems. Serve in role such as database developer/administrator, ETL developer, data analyst, BI analytics developer, &/or solution developer of contextual search applications. Act as a lead engineer & critically evaluate relevant technological advances & integrate this knowledge into new bus. tech. solutions. Design, engineer, & implement software & tech solutions by Enterprise Data Platform ecosystem. Demonstrate ability to resolve key project hurdles & assumptions by effectively utilizing available information & technical expertise. Utilize exp. w/ tools including Cloudera CDH, CDP, Amazon Web Services, EMR ecosystem (such as SOLR, Spark, Impala, Hive, Hue, Athena, Glue, etc.).Demonstrate high proficiency across a wide range of technologies & platforms related. to software design & development, programming languages, data integration, data warehousing, data analysis & visualization tools, data storage, network connectivity, & virtualization/cloud environments. Utilize exp. w/ Amazon Web Services Informatica tools (PowerCenter, Big Data Management, MDM), MarkLogic, SAS Analytics, python, & R. Demonstrate knowledge of pharma & healthcare business, & utilizing this knowledge in the rapid advancement of agile, impactful, & cost-effective solutions. Resp. for understanding & adhering to corp. standards regarding applicable Corp. & Divisional Policies, incl. code of conduct, safety, GxP compliance, data security, & software development lifecycle. Must have Bachelor's or foreign equiv. degree in Comp. Science or a highly related field of study w/ at least 6 yrs. related exp. in the following: (i) exp. in a several data processing roles such as database developer/administrator, ETL developer, data analyst, BI analytics developer, &/or solution developer. of contextual search apps.; (ii) exp. w/ tools incl. Cloudera CDH, CDP, Amazon Web Services, EMR ecosystem (such as SOLR, Spark, Impala, Hive, Hue, Athena, Glue, etc.); & (iii) exp. w/ Amazon Web Services Informatica tools (PowerCenter, Big Data Mgmt., Master Data Mgmt), MarkLogic, SAS Analytics, python, & R. Associate Service Consultant Associate Service Consultant, AbbVie Inc., North Chicago, IL. Deliver business value by maximizing financial investment & sustainability of the application & manage Service providers to quality outcomes. Demand & release change prioritization with plan build as required. Provide input & feedback into the Change, Release & Deployment processes & schedule ensuring minimal impact & downtime of changes to the business. Monitor & approve Change Records for ACoE Owned Changes. Accountable for Demand Approval by ensuring the right change, right change type, clear & complete scope/requirements. Provide budgetary impact of proposed changes to plan organization & ensure transfer of budget and updates portfolio tracker. Ensure that the Service Transition processes are fully executed. Approve readiness for support transition &serves as escalation point for any delays in service transition. Responsible for the fulfillment of Audit Artifact Service Requests. Coordinate with internal compliance team for internal compliance driven audit requests. Monitor MSP execution of audit process & procedures. Ensure timely & accurate delivery of external compliance driven audit artifacts. Govern the application recertification process occurs as scheduled. Provide audit results as needed. Evaluate & approve the Service Providers reported performance trends & the process improvement recommendations to identify areas where preventative maintenance might be performed to improve Applications performance & efficiency. Review ticket patterns & identify opportunities that were presented by their MSP. Approve SLA exception breaches. Responsible for reviewing the service provider Service Level Agreements & participating in any action plans that are required to address any deviations &/or improvement opportunities with the supplier. Manage the relationship with vendors to ensure superior service delivery for all application maintenance & support activities. Perform summary daily reviews of prior days ticket activity: queue levels, processing efficiency, backlogs, aging levels along with prior day Incidents. Ensure that ticket processing & the Problem Management engines are performing within expected operational parameters. Act as approver for SLA exception breaches. Serve as primary AbbVie contact point & first level of escalation for Incidents & Problems, including activities that require multiple teams to solution. Assist with the prioritization & escalation of system recovery issues with Cross-functional, Build & Infrastructure teams. Must possess a Bachelor's degree in Information Technology, Management Information Systems, Computer Science, Computer Engineering, or a highly related field of study with at least 5 years of experience, in the alternative, employer will accept a Master's degree in aforementioned fields). Each alternative must possess at least 1 year of experience in the following: (i) Information Technology field with Application outsourcing & terminology such as Minor Enhancements, ARC's/RRC's, Service Level Management & Vendor Management; (ii) experience interpreting data, including analyzing trends, solving complex problems, & presenting recommendations to management; (iii) experience managing & executing complex IT processes and demonstrated ability to identify exceptions to the process, or potential process improvements; (iv) experience with identifying and executing continuous improvement opportunities & cost reduction initiatives; & (v) experience with Software Development Lifecycle (SDLC) methodologies. Employer will accept any suitable combination of education, training or experience related to the job opportunity. Apply online at https://careers.abbvie.com/en & reference REF22826T.

Business Systems Manager Business Systems Manager, AbbVie Inc., (Vernon Hills / Waukegan (Lake County), Illinois. Work directly with business unit clients to understand specific business processes, business drivers and business strategy across multiple business units. Identify and communicate resulting needs and opportunities for business process improvement that can be enabled via technology. Identify information required to support business strategies and lead the development of appropriate information management strategies. Responsible for compliance with applicable Corporate and Divisional Policies and procedures. Identify current and emerging business needs and evaluates alternative technology solutions using standard information systems methodologies such as establishing business goals, vendor evaluations, performing market research, evaluating customer feedback, performing ROI analysis, and cost benefit analysis. Proactively seek out strategic business opportunities for the application of new or existing technology capabilities (across multiple business areas) with high-level business unit executives providing key opinion-leading clients with comprehensive strategic analyses and insights to help them discover strategic uses of technology products and services. Develop, lead, and review the creation of information systems strategy to support the strategic requirements of multiple business areas. Make recommendations to process stakeholders regarding the correct approach to achieve process improvement objectives, including business process outsourcing, application development or adopting business process management (BPM) practices. Develop business relationships and integrate activities with other BTOs to ensure successful implementation and support of project efforts. Manage relationships between clients involved and BTOs to assure effective communication between the groups is occurring. Broker services within BTS on behalf of customers; coordinates portfolio of solutions and identifies interdependencies. Identify the impact of any relevant statutory, internal, or external regulations on the organization's use of information. Responsible for the accuracy of the fit of the proposed business process improvements and the technical solution to the business needs and the information upon which the business justification and prioritization decisions are made. Communicate business needs and drivers to development groups to assure the implementation phase can fulfill the business need. Must possess expertise/knowledge sufficient to adequately perform the duties of the job being offered. Expertise/knowledge may be gained through employment experience or education. Such expertise/knowledge cannot be "quantified" by "time". Required expertise/knowledge includes: (I) working directly with business unit clients to understand specific business processes, business drivers and business strategy across multiple business units; (II) identifying current and emerging business needs and evaluating alternative technology solutions using standard information systems methodologies such as establishing business goals, vendor evaluations, performing market research, evaluating customer feedback, performing ROI analysis, and cost benefit analysis; (iii) developing, leading and reviewing the creation of information systems strategy to support the strategic requirements of multiple business areas; and (iv) making recommendations to process stakeholders regarding the correct approach to achieve process improvement objectives, including business process outsourcing, application development or adopting business process management (BPM) practices. Must possess a Bachelor's or foreign equivalent degree in Computer Science, Management Information Systems, Biology or a highly-related field of study plus seven (7) years of related progressive experience. In the alternative, employer will accept a Master's degree or foreign equivalent in Computer Science, Management Information Systems, Biology or a highly-related field of study plus six (6) years of related progressive experience, or employer will accept a Ph.D. degree

or foreign equivalent in Computer Science, Management Information Systems, Biology or a highly-related field of study plus two (2) years of related progressive experience. Employer will accept any suitable combination of education, training or experience. Apply at online https://careers.abbvie.com/en and reference REF22827J.

Senior GCP Compliance Auditor Senior GCP Compliance Auditor, AbbVie Inc., North Chicago, Illinois. Responsible for ensuring high quality clinical trials are performed in compliance with worldwide regulatory expectations. Demonstrate good scientific rationale and interpretation of data integrity through regulatory submissions. Responsible for preparing, conducting, and reporting audit activities of clinical trials activities utilizing software such as TrackWise, Salesforce, IMPACT, Veeva Vault, Spotfire, Medidata, InForm, YPrime, Endpoint, Premier, Calyx, CRF Health, etc. Responsible for leading investigator site audits to ensure compliance with global regulatory requirements. Lead internal audits to assess the systems processed and procedures in place to support the clinical trial conduct and their overall compliance with ICH GCP guidelines, applicable regulations, and the organization's Quality System. Appropriate protection of all human subjects participating in organizational Clinical Trials. Assist with Clinical QA program management activities in support of studies and projects to ensure compliance with regulations, guidelines, policies, procedures and sponsor requirements. Deliver consistent, high-quality documents and clinical program activities for Research and Development (R&D). Ensure that R&D remains in compliance with worldwide regulatory expectations and requirements. Lead and develop strategy for global Quality Assurance in alignment with R&D strategies. Interpret, explain and apply the applicable current regulations, guidelines, policies and procedures. Plan, organize and lead multiple GCP vendor compliance audits on a global scale. Initiate, manage, and participate in quality improvement projects. Prepare and present project progress reports to update management and keep the team(s) informed. Must possess a Bachelor's degree or foreign academic

equivalent in Physical Science, Life Science, Biochemistry, Cellular and Molecular Biology, Engineering or a highly related field of study with at least two (2) years of related experience in the following: (i) demonstrating good scientific rationale and interpretation of data integrity through regulatory submissions; (ii) preparing, conducting, and reporting audit activities of clinical trials activities utilizing software such as such as TrackWise, Salesforce, IMPACT, Veeva Vault, Spotfire, Medidata, InForm, YPrime, Endpoint, Premier, Calyx, CRF Health, etc; (iii) assisting with Clinical QA program management activities in support of studies and projects to ensure compliance with regulations, guidelines, policies, procedures and sponsor requirements; and (iv) initiating, managing, and participating in quality improvement projects. Data Science Program Lead II Data Science Program Lead II, AbbVie Inc., North Chicago, IL. Align Data & Statistical Science (DSS) study teams with program & study-level strategies. Lead the DSS Study Team & represent DSS as a member of cross-functional study team. Act as single point of contact & accountable operational lead from DSS. Coordinates associated DSS study teams to meet operational objectives. Utilize clinical trial systems including Electronic Data Capture (EDC), Interactive Response Technology (IRT) & Clinical Trial Management Systems (CTMS). Utilize understanding of Laboratory data, Clinical Outcomes Assessments (COA/eCOA), ECG, IRT, Pharmocokinetic & other external data types. Engage & connect global functional & cross-functional teams at study level. Interact with & influence cross-functional team members to achieve program objectives. Plan, coordinate, & deliver data management tasks within timeline. Utilize operational analytics & project management tools to optimize execution of programs & studies, manage internal & external resources, track study progress, & prepare study status reports. Author, revise, & review data management related plans & documentation, including Data Management Plan, Data Review Plan, Electronic Case Report Form (eCRF), & completion Guidelines. Anticipate

& identify issues that could affect timelines or quality & develop options & solutions, identify & mitigate risk and contribute to Risk Assessment & Management Plan. Ensure adherence to federal regulations & applicable local regulations, Good Clinical Practices (GCPs), ICH Guidelines, Standard Operating Procedures (SOPs), & functional quality standards. Perform project management skills including metrics analysis & reporting methodologies. Keep abreast of new &/or evolving local regulations, guidelines & policies related to clinical development. Participate as DSS study owner in regulatory inspections & internal quality audits. Participate in oversight of vendors & provide feedback related to clinical trial operations, issues, & trends in performance. Utilize reporting & data visualization tools such as Spotfire, J-Review, Business Objects &/or SAS to generate data review listings, also, project management tools such as Microsoft Project, Smartsheet or equivalent. Responsible for coaching & mentoring team members. Lead DSS innovation & process improvement initiatives & participates in cross-functional initiatives. Conduct study execution across functions. Conduct indirect supervision of employees as well as supervision of work of contract resources. Must possess a Bachelor's degree or foreign academic equivalent in Biology, Biotechnology, Information Technology, Business, or a related field of study with at least 2 years of experience in the following: (i) Electronic Data Capture (EDC), Interactive Response Technology (IRT) & Clinical Trial Management System (CTMS); (ii) planning, coordinating, & delivering data management tasks within timeline; (iii) authoring, revising, & reviewing data management related plans & documentation, including Data Management Plan, Data Review Plan, Electronic Case Report Form (eCRF), and Completion Guidelines; (iv) project management skills including metrics analysis & reporting methodologies; & (v) Spotfire, J-Review, Business Objects &/or SAS to generate data review listings. Position requires work at various & unanticipated work locations throughout the U.S. 100% telecommuting permissible. Apply online at https://careers.abbvie.

com/en & reference REF23193M

Senior Clinical Pharmacologist Senior Clinical Pharmacologist, AbbVie Inc., North Chicago, Illinois. Conceive & execute novel scientific research of development in Clinical Pharmacology that achieves projects & Clinical Pharmacology & Pharmacometrics (CPPM) goals. Generate new PK/PD proposals & lead those efforts. Investigate, identify, develop, & optimize new methods & techniques in PK/PD field. Act as lead PK scientist in their area of expertise & critically evaluate relevant Clinical Pharmacology, PK/PD & regulatory advances & integrate this knowledge into research or development programs. Employ understanding of physicochemical properties as related to drug delivery & preclinical & clinical formulation design, as well as physiological barriers to drug absorption, including various potential transport mechanisms. Contribute to clinical development by supporting Phase 1-4 studies including study design, & clinical pharmacology strategy. Design & perform diverse in vitro & ex vivo assays to evaluate absorption & other development potential. Author regulatory documents including protocols, study reports, population PK reports, exposure-response analyses reports, relevant section of investigator brochures, common technical documents, white papers, & other similar documents. Conduct data analyses including noncompartmental analyses, modeling & simulation, literature data analyses. Employ experience with analytical techniques & typical equipment utilized for physicochemical characterization of small-molecule candidates (e.g., HPLC, DSC, TGA, PXRD, drug release testing). Participate & present at various departmental & cross functional teams such as study teams, clinical pharmacology & biopharmaceutics, clinical strategy team, CPPM leadership team, journal club. Perform data analysis in order to conduct analysis & interpretation of trends in large data sets by utilizing statistical tools such as Python Pandas & Microsoft Excel. Employ experience with PBBM/PBPK & compartmental analysis to interpret pharmacokinetic data & perform oral absorption modeling. Collaborate with scientific support from other CPPM functional groups to

provide unified clinical pharmacology position to clinical, CMC & regulatory teams. Author scientific publications & present at scientific conferences. Must possess PhD or foreign academic equivalent in Pharmaceutical Science, Pharmaceutical Chemistry, Chemistry, Chemical Engineering or a highly related field of study with an academic or industrial background in the following: (i) physicochemical properties as related to drug delivery & preclinical & clinical formulation design, as well as physiological barriers to drug absorption, including various potential transport mechanisms; (ii) designing & performing diverse in vitro & ex vivo assays to evaluate absorption & other development potential; (iii) analytical techniques & typical equipment utilized for physicochemical characterization of small-molecule candidates (e.g., HPLC, DSC, TGA, PXRD, drug release testing); (iv) performing data analysis in order to conduct analysis & interpretation of trends in large data sets by utilizing statistical tools such as Python Pandas & Microsoft Excel; & (v) PBBM/PBPK & compartmental analysis to interpret pharmacokinetic data & perform oral absorption modeling. Apply online at https://careers.abbvie.com/en & reference REF23206B.

Manager I, Market Access Insights Manager I, Market Access Insights, AbbVie Inc., Mettawa, Illinois. Responsible for leading communication of market access insights to leadership requiring a broad range of market access expertise as the brands commonly experience differing market access challenges. Lead development of GPO, Specialty Pharmacy, Health Plan & PBM contracting strategies for launch brands across payer channels through advanced modelling techniques, communicating analytical narratives that describe opportunity & risks of stakeholder negotiations, & informing financial projections based on launch pricing & contracting strategies. Derive findings & implications from payer, physician, distributor & patient/consumer analytics to strengthen commercial understanding of marketplace dynamics, performance, & brand opportunities. Inform forecasting & brand planning processes & develop fact-based

marketing & sales strategies to optimize performance. Align business issues with findings & implications with some supervision. Guide development of marketing investment strategies to increase effectiveness &/or efficiency of promotional activities. Influence deployment of strategy through executional recommendations across marketing & sales tactics for multiple brand &/or indications. Complete timely evaluation of program impact/response & recommend appropriate actions. Utilize syndicated & AbbVie proprietary data, data science & modeling techniques & ability to synthesize insights into compelling narratives. Utilize knowledge in supplier & stakeholder management, leading external analytics to deliver compelling learnings, & formulate analytical strategies appropriate to issue at hand. Deliver insights based on analytics generated by leveraging multiple healthcare data sources, including physician & patient level data utilizing programs. Lead delivery of brand specific market access analytical insights in response to specific market access issues/trends. Understand impact of utilization management, tiering & medical policy impact on overall demand, line of therapy & co-pay support. Conduct investigative analytics to validate &/ or quantify market phenomenon related to competitive or customer tactics. Identify value drivers that guide clinical data development & value positioning through quantitative methods. Leverage custom & syndicated data sets to identify & address key business issues relative to product & indication-level performance ensuring that multiple stakeholder perspectives are considered. Integrate & synthesize information to report key insights to internal stakeholders & deep understanding of healthcare data & policies. Bridge gap between new patient starts & total demand & integrate & synthesize all available information specific to issue. Understand sub-national (Accounts or physicians) drivers of brand performance, providing more granularity to performance dynamics & opportunities across distribution channels & customers. Create analytic models that address critical issues & meet key business criteria & key technical criteria. Manage stakeholders, external partners to increase & enhance use of advanced modeling

& analytic methods & produce results that fully leverage available data & analytics. Develop & communicate demand forecasts in support of all brand & financial planning processes, effectively advising organization in setting financial expectations for assigned brands as well as optimizing allocation of resources to achieve the plan. Effectively communicate results of complex analytical models & influence action to improve brand performance. Identify & evaluate data sources that will enhance customer, market & competitive understanding, & influence budget holders to secure sources essential to driving business forward. Bachelor's degree in Business Analytics, Economics, Statistics or a highly related field of study with at least 5 years of related experience. Alternatively, employer will accept a Master's degree in aforementioned fields. Each education alternative with at least 1 year of related experience in: (i) informing forecasting & brand planning processes & developing fact-based marketing & sales strategies to optimize performance; (ii) delivering insights based on analytics generated by leveraging multiple data sources, including physician & patient level data utilizing programs & tools; (iii) Integrate & synthesize information to report key insights to internal stakeholders; & (iv) creating analytic models that address critical issues & meet key business criteria & key technical criteria. Employer will accept any suitable combination of education, training or experience related to the job opportunity. 15% domestic travel required. Apply online at https://careers.abbvie.com/en & reference REF23194H.

Senior Analyst, Marketing Business Intelligence Senior Analyst, Marketing Business Intelligence, AbbVie US LLC, North Chicago, IL & various & unanticipated worksite locations throughout the US [Remote]. Collaborate with stakeholders to understand analytic needs across the business & provide accurate & actionable analysis to support their critical business decisions. Design innovative analytic approaches to test hypotheses, extract actionable insights by identifying patterns in structured & unstructured data. Develop recommendations to drive business performance by

utilizing statistical analysis & modeling, A/B Testing, Python, SQL programming, Tableau & MS Excel. Apply advanced analytics techniques such as core statistical methods, data mining & data visualization to extract actionable insights through analysis of large-scale, high-dimensional data. Write SQL queries in Snowflake to extract data from data warehouse in order to answer Adhoc analytics questions and show trends. Responsible for developing dashboards to enable clear visibility into business performance utilizing SQL programming, Tableau & MS Excel. Enable clear visibility into business performance by building & maintaining dashboards using Tableau Desktop. Publish, schedule & maintain dashboards using Tableau Online. Responsible for following Agile methodology & organize projects & tasks using Jira. Provide documentation of work & create data dictionaries in Confluence. Work with data engineers to ensure accurate & up-to-date data powers each analysis. Employ experience with modern visualization & programming tools such as SQL programming, Tableau, Looker, MS Excel, ETL, etc. Bachelor's degree or foreign academic equivalent in Mathematics, Statistics, Operations Research, Computer Science, Industrial & Systems Engineering or a highly related field of study. with 3 years of related progressive experience in: (i) designing innovative analytic approaches to test hypotheses, extract actionable insights by identifying patterns in structured & unstructured data; (ii) developing recommendations to drive business performance by utilizing statistical analysis and modeling, Python, SQL programming, Tableau & MS Excel; (iii) applying advanced analytics techniques such as core statistical-modeling, data visualization & data mining to extract actionable insights through analysis of large-scale, high-dimensional data; (iv) developing dashboards to enable clear visibility into business performance utilizing SQL programming, Tableau & MS Excel; & (v) modern visualization and programming tools such as SQL programming, Tableau, Looker, MS Excel, ETL, etc. 100% Telecommuting Permitted. Apply online at https://careers.abbvie.com/en & reference REF23207S.

Project Designer, Chicago. Develop 3D models, structural system & component designs. Perform computations for loading conditions. Review design drawings against design intent. Travel to local job sites. Bach in civil eng./related, 6 mos exp. Civil/structural eng., familiar w/ MATLAB, FEA software required. Mail res., cov. Let. To R. Magruder, Goodfriend Magruder Structure LLC, 53 W Jackson Blvd, Ste. 340, Chicago, IL 60604.

DePaul University seeks Instructors for Chicago, IL location to teach courses in degree & credential programs in the Dep of Leadership, Language, & Curriculum & Value-Creating Edu for Global Citizenship, Bilingual-Bicultural Edu & Curriculum Studies. Ph.D. in Value-Creating Edu for Global Citizenship/Curriculum Studies/related field req'd. 5% telecommuting permitted. Apply online: https://apply.interfolio.com/143583, REQ ID: 136201

Paralegal sought by Kriezelman Burton & Associates in Chicago, IL to assist lawyers by investigating facts, preparing legal docs & researching legal precedent. Reqs Bach deg in any field. Mst hv perm auth to wrk in US. Snd rsm & cvr lttr to 200 W Adams, Ste 2211, Chicago, IL 60606.

Culinary Arts Instructor – Summer Chicago Community Organization seeks a creative, energetic, artistic individual as Instructor Cake Decorator of a youth program at Olive Harvey College. Experience and knowledge in cake and pastry decorating, sculpting, cake design, and clean presentation exhibitions. Able to work as part of a team and teach a class of young people aged 14 -15. For more information contact Ms. Williams at 773-517-5108.

Middle Office Sr. Analyst CTC Trading Group, LLC seeks a Middle Office Sr. Analyst in Chicago, IL to assist with various reporting and reconciliations including P&L, capital, volume, and key metrics. Telecommuting is permitted. Apply at https://www.jobpostingtoday.com/ Ref # 60246.

Network Optimization Engineer Miniat Holdings LLC in South Holland, IL seeks a Network Optimization Engineer to order, structure and visualize manufacturing data to drive up OEE and foster lean manufacturing processes. Must have a Bachelor's degree in Mechanical Engineering or related. Must have 1 year experience in job offered, Mechanical Engineer, Systems Engineer or related experience in Operational/Production Engineering. Must have have gained the following either through education or experience: Structured Query Language (SQL) (2) Design, develop and test optimization using MATLAB (3) Using Autodesk - AutoCAD to design and develop graphical calculations manufacturing solutions (4) Design and update piping and instrumentation diagrams to troubleshoot mechanical issues (5) Optimize heat transfer variables to match capacity demands and pinpoint potential thermal inefficiencies. Apply online at https://www.miniat. com/about-us/careers/. Refer to Job ID: VC24

Sr. Scientist I – Cell & Molecular Biologist Sr. Scientist I - Cell & Molecular Biologist, AbbVie Inc., North Chicago, IL. Design, execute, & interpret critical experiments to answer scientific questions. Generate & test hypothesis by designing, performing, & interpreting laboratory-based experiments. Read literature critically & analyze genomic data to support these activities. Develop in vitro & in vivo screening assays in collaboration with therapeutic area scientists by generating cell lines, developing lentiviral & RNP delivery methods, & integrating & optimizing screening protocols. Responsible for transfection, lentiviral transduction, flow cytometry, cell sorting, next generation sequencing, & performing CRISPR screens in neuronal & glial cell types. Perform pooled & arrayed CRISPR screens with FACS-based molecular & functional assays on immortalized cell lines, primary cells, & iPSC-derived cells. Work closely with NGS & bioinformatics scientists to process genomic samples, analyze screening results, & generate screening hits for follow-up studies. Investigate novel screening hits in the context of disease biology by generating & testing hypothesis using a variety of biochemical, molecular, cellular, & genomic assays. Utilize molecular analytic methods including DNA/RNA isolation, PCR/qPCR, molecular cloning, genotyping, &/or western blot. Map candidate genes to known disease genetic networks through experimental & bioinformatic approaches. Learn, understand, & master new experimental techniques, & act as a resource or mentor for others. Perform RNA-sequencing, RNAi (shRNA/siRNA), & CRISPR gene editing. Collaborate and communicate with cross-functional scientists on experimental designs and results and scientific goals. Report research progress to management on a regular basis, provide project updates to cross-functional project teams, and provide scientific presentations to department and other internal scientific forums. Seek and advance opportunities to present research results at external scientific conferences & publish high-impact articles in peer-reviewed journals. Must possess a PhD or foreign academic equivalent in Biochemistry and Molecular Biology, Biological Sciences, Chemistry, or a closely related scientific field with an academic or industrial background in: (i) transfection, lentiviral transduction, flow cytometry, cell sorting, next generation sequencing, & performing CRISPR screens in neuronal & glial cell types; (ii) molecular analytic methods including DNA/RNA isolation, PCR/qPCR, molecular cloning, genotyping, &/or western blot; & (iii)RNA-sequencing, RNAi (shRNA/siRNA), & CRISPR gene editing. Apply online at https://careers.abbvie.com/en & reference REF23197A

Energy Modeling Specialist exp U.S. Services Inc. is seeking a Energy Modeling Specialist in Chicago, IL to Dvlp, implement, & validate energy models for various building/project types, energy systems, & technologies using IESVE (Integrated Environmental Solutions Virtual Environment), or relevant software tools as reqd. 100% remote work allowed; can live anywhere in the US. Co headquarters in Chicago, IL. Apply at www.exp.com, search for job# 108066

IN-HOUSE COUNSEL Electronics recycling svc co. seeks a f/t In-House Counsel. Req. J.D. plus 2yr exp as Attorney or In-House Counsel using MS Office & legal research tools (including Westlaw and Lexis). Req. Illinois Bar. Jobsite: Chicago, IL. Send resume to: Jenny Cheng, jennyc@rdirecycling.com. RDI, Inc. EOE.

Sales Engineer in Itasca, Illinois to utilize advanced knowledge of and experience with products and service offerings, and an understanding of the customer's business to develop customized proposals that present creative solutions and successfully sell the organization's capabilities. (if applicants apply via ER website). Bachelor's degree in engineering in any field combined with industry experience in lithium battery manufacturing req'd. 5 yrs' of experience as Development Engineer, Sales Engineer or related or comparable occupation within the industry req'd. Requires one week per month domestic travel to visit customer with locations varying. For position details & to apply, visit: Sugino Corp @ https://suginocorp.com/about-sugino-corp-usa/careers/

Engineer, Technology II Engineer, Technology II, AbbVie Inc., North Chicago, IL & various & unanticipated worksite locations throughout the US [Remote]. Responsible for coding to organizational corporate standards to ensure Cloud & OS security compliance. Assist developers with application & code deployment, including code deployed utilizing CI/CD processes & standards of practice. Assist developers with code remediation when necessary to align with corporate Cloud & OS security & compliance. Implement new code to keep up with the agile demand of organizational R&D. Responsible for utilizing knowledge of multiple automation toolsets & programming languages for both on premise & cloud computing deployments. Collaborate with various business units to provide consultation & support on-premise hardware & cloud solutions with a focus on best practices and security. Responsible for designing, executing, & supporting cloud services & environments such as Amazon Web Services (AWS). Investigate & engineer new technologies to enhance & secure on-premise & cloud platforms utilizing integration & automation tools such as GIT, Jenkins, Ansible, python, YAML, JSON, PowerShell, Bash, CloudFormation & Terraform. Employ experience with cloud native AWS security tools such as Systems Manager, Config, CloudTrail, CloudWatch, & IAM. Utilize experience with various Operating System core components such as Windows & Linux. Review architectural diagrams for proposed solutions & implementing standard cloud or on-premise services based on computer, data & security requirements. Manage automated configuration & deployments of Operating Systems for both on-premise & Cloud. Develop scripts for automating client & server functions.
